Portfolio Manager Comment as of December 2023

The Crypto-linked equity portion is currently at 25%, and we have been rotating towards high beta stocks in the crypto market, accompanying the opportunities that the market offers. The remaining 75% is invested in Negotiable Obligations with dollar link adjustment, Sovereign Bonds with dollar link adjustment and Short Bills with exchange rate Futures. After the discrete jump in December, the positioning is greater in dual bonds that offer the best adjustment between exchange rate and inflation.
